## International Journal of Computer and Communication Engineering

## **CONTENTS**

Volume 1, Number 1, May 2012
Subspace Based Face Recognition on Hypercomplex Field
The Tactics about Orbit Determination of Satellite with the Short-Arc Tracing Data
Biased-Incremental Clustering: A Flexible Knowledge Extraction Algorithm
A Method Based on Statistics for Extracting Text from Web Pages
Study on the Methodology System of Sports Statistics Data in Excel
Research on Cooperative Control in Intelligent Agriculture Complex System
Analyses of Green Products in Duopoly Market on the Base of Enviroment Quality Model
Land Use Efficiency Appraisal Based on Cadastral Spatial Data Mining
Association Rules Mining for Urdu Language
Temporal Data Classification of Diabetes Mellitus on Health Examination Data of Factory Employees
Automatic Translation of Heterogeneous Data Models
Sentiment Analysis of Polish Texts
Using Machine Translators in Textual Data Classification43 Leila ROUKA, Cemal KÖSE, and Parham TOFIGHI
Author's Native Language Identification from Web-Based Texts47 Parham Tofighi, Cemal Köse, and Leila Rouka
Novel Node Betweenness Based Fault Detection for Streetlamp Control Network

Runmin Wang

Empirical Evaluations of Automatic Forum Selector Chen-Huei Chou	55
Research of the Multi-Dimensional Cloud Classification Algorithm Li Qin and Bing Li	59
Multi-Label Text Classification via Ensemble Techniques Martin Boroš, Franky and Jiří Maršík	62
Traffic Control by Bluetooth Enabled Mobile Phone G. Manikandan and S. Srinivasan	66
Wavelet Variance and Entropy of DNA Sequences En-Bing Lin and Mojisola Oyapero	70
